

# The champion

Why do some people excel in sports?

Genes?  
That depends on  
the sport!

It has nothing  
to do with genes;  
you have to train  
very hard

Your genes  
determine if you will  
become an outstanding  
sportsperson

To become  
an outstanding sports-  
person you need a  
balanced and healthy  
diet.

What do you think?
