

MYSTERY GRAPHS

Make mystery graphs showing how the population of a place or an activity changes over a particular 24 hour period. Guess which graph goes with each place or activity.

Goal: to make the graph communicate so well that someone can guess which activity or place it describes.

movie theater
the beach on a warm summer day
the mall
the library
the school yard
the principal's office
watching TV
a store 24
jogging
eating
public transportation
